

**Japanese Universities and Colleges, with Major
Research Institutes, 1963.**

Tokyo: Japan Overseas Advertiser Co., Ltd.
(Kabushiki Kaisha Bōeki Kōkokusha)
1963, 265 pp., ¥ 3,000.

This attractive, profusely illustrated, and generally carefully prepared volume covers an area far larger than the scope of this journal. It is reviewed here briefly, because it includes all the recognized sectarian educational institutions in the country and has information in a form that is nowhere else available

in English.

In addition to a somewhat detailed statement about the universities and colleges, it contains articles on "How Does (*sic.*) Japanese Universities Help Japanese Industry," "The School System from Admission to Curriculum," and "What Foreign Students Have To Do,"

REVIEWS

and a list (with names, addresses, and very brief data) on all the junior and technical colleges, and major research institutes, a set of charts and tables, and statistics on educa-

tion in Japan that should be very useful for reference purposes. It is well done; but in places the English leaves much to be desired.
